JUET

Jaypee University of Engineering and Technology, was established in the year 2003 in the name of Jaypee Institute of Engineering & Technology based on the MOU signed between Jaiprakash Sewa Sansthan and the Government of Madhya Pradesh with an aim of becoming a Center of Excellence in Engineering and Technology. The Government of MP has vide gazette extra ordinary no. 3 of 2010 has established Jaypee University of Engineering and Technology (JUET), Raghogarh, Guna as a private university in the State of MP.

This is one of the three institutions of higher learning in the field of Degree level Engineering education established under the Jaiprakash Sewa Sansthan (JSS), which recognizes the role of IT and emerging technologies in improving the quality of life of the people of India. JUET's location at Raghogarh, in Guna district is a well thought out process. It is being developed as a major center to provide competent, well trained technical manpower to the region. Its campus on the national highway linking Agra to Mumbai is being developed on a 120 acres piece of land as modern institution of higher learning in the fields of engineering, technology and sciences.

It aims to produce professionals who can be leaders in innovation, entrepreneurship, creativity and management. Presently, this University offers B. Tech., M.Tech. and Doctoral Programmes in Chemical Engineering, Civil Engineering, Computer Science Engineering, Electronics & Communication Engineering, Mechanical Engineering and Applied Sciences.

About Workshop

Communication networks are often used to transfer vital and confidential information for a variety of purposes, and if we do not update our networks to cope up with the latest challenges, the networks may remain vulnerable, as a consequence may attract the attention of mischievous users to disrupt or destroy the information flow. This has led to heightened awareness of the need to become aware of the current developments in network technologies to protect data and resources from disclosure. Some attacks on networks are planned and specifically targeted, whereas others may be opportunistic, resulting from eavesdropping activities. Further, the threats to network are continually increasing with discovery of new issues, and solutions to counter those issues are needed. With this workshop attempts will be made to provide an insight into the enduring principles of network communication, routing, security and their implementations.

Topics to be covered

Tentative list of topics to be deliberated in this workshop is as mentioned below-

- TCP/IP Protocols & Internetworking
- Network Communication & Security
- Network, Transport,Application layer Security
- Image Security
- Security Image Communication
- Cryptography & its implementations
- Secret Key & Public Key Cryptography
- State of the Art Networks
- Wireless Networks Performance Anlaysis
